FFSHH

Welcome to
Latus Prime.

She doesn't look like
much now, but she's
the most advanced ship
in the multiverse.

Who are you guys?
I mean, I know who
you are but....

You know what
I mean...

We are all Jenny Everywheres
from different universes

One day, while
meditating,
I discovered
that there
are certain agents
in 5D space that
threaten countless
universes en
masse. So I designed
and built the Latus
Prime to travel
outside of space-time
combat these threats

It's powered by our
shifting ability, but
it requires 5 Jennys
to travel to 5D space

So how did you get here?
And how did you gather
up all these Jennys?

I don't require the ship to
shift. I recruited them myself.
And as for how we got here, it
took an unbelievable amount
of concentration.

Enough, you are not a tourist here.
We're in the middle of a
battle and we're wasting
precious time. Your universe
is the next to be devoured,
which is why we landed here.

Our fifth member was killed
and you're going to replace
her. You have no choice and
unlike her you were not
chosen, you were simply
all we had to work with.
Now get in your alcove
and get comfortable.

The war is on.

That's the Shifter. It's tough
in her universe, but she's right.

Oh man,
That was so
draining.

We're coming
up on the
threat now.

What is the threat?

That is.

What the Hell?
The big threat
is frikin' Pac-Man?

No, nothing here is even
remotely conceivable
to our human minds.

Those are not mere Earths,
they are whole universes, we're
just perceiving them as Earths.

And that is most definitely
not Pac-Man. We're not sure what it
is, but it's a 5-D entity of some sort.

We are now within firing range.

Does anyone have even a working theory as to what that thing is?

I believe that the multiverse is really a massive Quantum computer at the end of time, simultaneously running an infinite number of calculations, and that thing is what happens when an equation is completed.

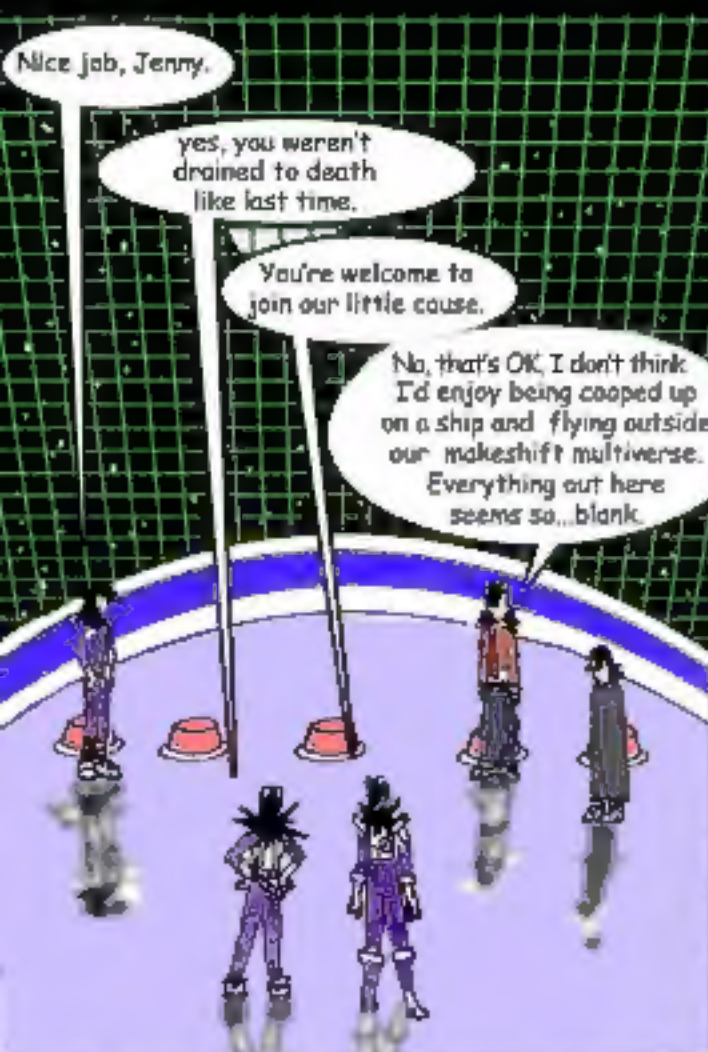

Okay, that was
incredibly humbling.

We can't stop it. It's got dimensions
we can't even imagine. It's enourmous
really. All we can do is steer it towards
a string of dead, unpopulated universes.

So how do we stop it?
What are we firing at
it anyway, nukes?

And we're firing condensed shifter
energy, mainly from me, as I'm an
endless reservoir. The 5-D energy
we use to move between universes
seem to affect it, however marginally.

The entity is changing course

THE
END
